Release Notes

The Release Notes provide a list of useful topics and links for when you install IBM® Cognos® Business Viewpoint 10.1.0.

System requirements

To review an up-to-date list of environments supported by the product, such as operating systems, patches, browsers, web servers, directory servers, database servers, and application servers, see

Installing IBM Cognos Business Viewpoint 10.1.0

For instructions on how to install the product, see the following Installation and Configuration Guides on the web at

http://publib.boulder.ibm.com/infocenter/cbv/v10r1m0/index.jsp

- IBM® Cognos® Business Viewpoint Server Installation and Configuration Guide
- IBM Cognos Business Viewpoint Client Installation and Configuration Guide
- IBM Cognos Business Viewpoint for Microsoft Excel Installation and Configuration Guide

Before you start the installation, see your system administrator if you do not have one or more of the following:

- You must be the administrator for the computer where you are installing Business Viewpoint.
- You must have a data repository on a supported database server. See the System requirements for more information.
- You must have a user with the appropriate permissions and privileges to the database.

Fix list

The fix list compiles the known issues that were addressed in this release. The fix list for IBM® Cognos® Business Viewpoint 10.1.0 is available here:

http://www.ibm.com/support/docview.wss?uid=swg27019009
Known problems

Known problems are recorded in individual documents in the Support knowledge base. As problems are discovered and resolved, the knowledge base is updated and maintained with new information. By searching the knowledge base, you can quickly find workarounds or solutions to problems.

A list of all known technotes that are specific to IBM® Cognos® Business Viewpoint 10.1.0 is available here:

Technotes about Cognos Viewpoint

You can track problems that are discovered and reported to IBM as a result of a product defect. These APARs (Authorized Program Analysis Reports) remain open until a fix is available.

A list of all open APARs for Cognos Business Viewpoint is available here:

Open APARs for Cognos Business Viewpoint

IBM Cognos Planning - Contributor adapter

You may encounter some issues when using the IBM® Cognos® Planning - Contributor adapter in IBM Cognos Business Viewpoint Client.

When nominating data, the following may occur:

• In the Select Data Nominate Wizard page, you expand the Planning Store folder. You then see this error message:

<epSOAPBody><errorCode>-20</errorCode><errorText>Failed to receive response over socket</errorText></epSOAPBody>

• When nominating an e.list or right, you see this error message:

java.lang.ArrayIndexOutOfBoundsException:
Array index out of range: 1

When subscribing, the following may occur:

• In the Select Location - Subscribe Wizard page, you expand the Planning Store folder. You then see this error message:

<epSOAPBody><errorCode>-20</errorCode><errorText>Failed to receive response over socket</errorText></epSOAPBody>

• The subscribe is successful but there are no e.list items added in the elist.

The solution is to contact IBM Customer Support for the IBM Cognos Planning 8.4.1 updater.
