

IBM Certified Solution Designer Content Management Document Manager

Solution Designer at a Glance

Certification Requirements:

- To attain the *IBM Certified Solution Designer - Content Management Document Manager* certification, candidates must pass Exam 445.

The IBM Certified Solution Designer for Content Management Document Manager (Exam 445)

enables information management professionals and line of business staff to prove their competency in designing and implementing document management solutions using IBM's DB2 Document Manager technology to:

- Solve the critical business issue of automating the complete life cycle of business documents
- Create and deploy appropriate document management user interfaces to groups with diverse requirements and skill levels

The certified individual should be able to perform high level design and requirements gathering, install and configure Document Manager, troubleshoot problems, perform design configuration, handle a variety of clients, integrate applications, and take advantage of additional services provided by Document Manager.
