

# IBM Certified Application Developer DB2 9 Application Development

## Application Developer at a Glance

### Certification Requirements:

- To attain the IBM Certified Application Developer – DB2 9 certification, candidates must pass 2 exams (730 and 733) or be certified as an IBM Certified Associate - DB2 Universal Database V8.1 for Family Fundamentals and pass exam 733.

### Recommended Prerequisite:

- Significant experience as a DB2 9 Application Developer

An IBM Certified Application Developer is an intermediate or advanced level application developer specializing in creating applications that run on any of the DB2 platforms: Linux, UNIX (including AIX, HP-UX, and Sun Solaris), and Windows, z/OS, s/390, and iSeries. This individual has strong skills in all common programming tasks as well as strong skills in one or more of the specialty areas: embedded SQL programming, ODBC/CLI programming, .NET programming or Java programming.
