

Drop-In ID: OPDM-09.01.00-009
Product: IBM InfoSphere Optim Designer
Release: 9.1.0.4
Problem ID:
Date: 18 November 2013

Description: Applies iFix to IBM InfoSphere Optim Designer 9.1.0.4-34. This iFix updates the JRE to Java 1.6.14.

Prerequisites: IBM® InfoSphere® Optim™ Designer 9.1.0.4-34
Co-requisites: OPDM-09.01.00-009 for Optim Runtime Services and
OPDM-09.01.00-009 for WebSphere Application Server - Community Edition

Supersedes: None

Special Notes: Only the JRE used by the Optim Designer is updated.

OS Platforms Corrected: Windows

Corrective Actions:

Section I

How to install this iFix:
~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~

1. Extract OPDM-09.01.00-009DesignerPatch.zip to a directory.
For example:
Windows: c:\temp\OPDM-09.01.00-009DesignerPatch
Linux and UNIX: /temp/OPDM-09.01.00-009DesignerPatch

2. Open a command prompt for directory
Windows: <install_dir>\IBM\Installation Manager\eclipse

3. Run the command:
Windows: IBMIM -input c:\temp\OPDM-09.01.00-009DesignerPatch\install.xml

4. When Installation Manager starts, click Update to start the Update wizard.

5. Continue through the Update wizard to install the fix.

How to uninstall the iFix:
~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~

1. Start IBM Installation Manager.
2. Select 'Uninstall', then select 'OPDM-09.01.00-009 1.0.0' and follow the flow.

Automatic uninstalls:
~~~~~~~~~~~~~~~~~~~~~~

This iFix is uninstalled automatically if there is no longer a package installed to which the iFix applies. This is checked during updates and rollbacks.
